- One (1) lot on a Cent account is equal to 0.01 lots on a Standard or Pro account structure;
- If the nominal contract value of one (1) lot for Stocks, Crypto, Indices, or Energies sits below $100,000, the lot calculation applies as: **Volume = (1 lot × Contract Size × Price in USD) / 100,000**;
- When liquidating positions utilizing the "Close By" terminal feature, the officially recognized trading volume is recognized as exactly half (50%) of the combined volume of each position.

5.7. Calculated withdrawable profits are credited to the Client's USD wallet or live trading account on the fourth (4th) day of each month, in accordance with the volume executed in the previous month.

5.8. There is no global time limit for the Client to execute the required trading volume on live accounts to claim their accumulated bonus profit.
